ABOUT ME

Product Manager and Game Designer with several years of experience in game industry. Experienced in game ideation, gameplay design, rapid prototyping, and production planning. Experienced in using AI tools to prototype game concepts and project management tools such as Jira to organize tasks, coordinate teams, and streamline development workflows. Focused on turning creative ideas into engaging games through structured planning and iterative development.

EDUCATION

Digital Game Design
Bachelor's Degree | GPA: 3.40/4.00

Bahcesehir University
2018 - 2023

EXPERIENCE

Product Manager

Ziylan Medya (3Dinoz Games)
February 2026 – Present

Managed the development of casual and hybrid-casual mobile games, overseeing game design, product planning, analytics, and team coordination.

- Generated and presented game concepts, translating ideas into structured game proposals and Game Design Documents (GDDs).
- Developed AI-assisted prototypes to rapidly validate gameplay ideas and communicate concepts through visual references.
- Established production pipelines to streamline content creation and accelerate game development.
- Managed task prioritization, sprint planning, and team coordination using project management tools such as Jira.
- Monitored game performance through KPI tracking and game analytics to support product and design decisions.
- Conducted A/B testing to evaluate gameplay and product improvements.
- Planned and managed LiveOps activities to support ongoing game development and player engagement.
- Coordinated the development of custom Unity Level Editors and used them to design and produce game levels.

Founder

Promander Games
March 2025 – February 2026

- Founded an independent game studio focused on developing original PC and mobile games.
- Managed independent game projects from initial concepts through development and production.

Freelance Game Designer

Self-Employed | Freelance
November 2023 – February 2025

- Provided game design services across multiple client projects.
- Created Game Design Documents (GDDs), gameplay mechanics, and core gameplay loops.
- Developed gameplay systems and prototypes using Unity.
- Designed original game concepts and board games tailored to client requirements.

Product Manager

Perwella
June 2023 – November 2023

- Managed B2B and B2C product operations across e-commerce marketplaces, including product launches, pricing, and inventory management.
- Analyzed sales performance and coordinated promotional campaigns to improve marketplace operations.

Game Developer

Midquest Games
May 2022 – January 2023

Worked on hyper-casual and hybrid-casual mobile games, contributing to gameplay development, level design, and visual production.

- Designed and implemented game levels directly in Unity.
- Developed reusable gameplay systems and code to streamline production workflows.
- Optimized game performance for mobile platforms.
- Created shaders and VFX, implemented animations, and collaborated with designers to refine gameplay features.

Game Designer / Developer

Fernvaille | Internship
October 2021 – January 2022

- Contributed to the design of a Battle Royale survival game, developing gameplay ideas and creative in-game content.
- Developed a third-person action game prototype using Unreal Engine 4 and Blueprints.
- Implemented character locomotion, animation systems, and AI enemy behaviors using the Environment Query System (EQS).
